Profile Summary

I am an Electronics and Communication Engineering student with skills in Python, Machine Learning, and Data Analysis. I am eager to launch my professional career by contributing to innovative, AI-driven solutions. I have strong problem-solving and communication skills, and a solid foundation in Artificial Intelligence to deliver high-quality results in a dynamic environment.

Experience

AICTE Virtual Internship | Artificial Intelligence (AI) Intern

05/2023 - 08/2023

AI Fundamentals Exploration: Completed a comprehensive 8-week remote internship program focused on mastering core Artificial Intelligence concepts and methodologies.

Machine Learning & Deep Learning: Studied and applied foundational principles of Machine Learning, Deep Learning, Natural Language Processing (NLP), and Computer Vision.

Data Science Implementation: Practiced data manipulation and model building using industry-standard tools including Python, Pandas, NumPy, and Jupyter Notebook.

Education

SRK Institute of Technology

08/2022 – 06/2026

Vijayawada, Andhra Pradesh

Bachelors of Technology in Electronics and Communication Engineering - Scored **7.58 CGPA**

SVKP&PV Junior College

06/2020 – 04/2022

Penugonda, Andhra Pradesh

Intermediate (MPC) - Scored **64.8%**

Smt. Annapurna Vidya Niketan

06/2019 – 04/2020

Velivenu, Andhra Pradesh

Secondary Education - Scored **9.61 CGPA**

Academic Projects

Password Door Lock Using Arduino By Tinker Cad

01/2024 - 04/2024

It leverages Arduino Uno and Tinkercad to engineer a virtual password security system, enabling secure authentication. C++ firmware is developed with string comparison logic to handle the core security protocols. A keypad, an I2C LCD, and a servo motor are then integrated to build a complete, end-to-end hardware solution. This ensures robust system architecture and reliability, which is thoroughly validated through rigorous state-transition testing.

Skills Used: C++, Arduino, Tinkercad, Embedded Systems, Hardware Integration, System Validation.

Secure Multi-City Office Network

12/2025 - 04/2026

Designed a secure, 3-tier Metropolitan Area Network (MAN) connecting offices in Hyderabad, Bangalore, and Mumbai. The architecture ensures high availability via OSPF routing, dual WAN links, and HSRP for automated failover. It integrates department-specific VLANs and extended ACLs for strict security, alongside dual-SSID wireless deployments and NAT/PAT for IP optimization. The entire setup, including centralized data center services, was thoroughly simulated and validated for robust performance.

Skills Used: Cisco Packet Tracer, Network Architecture, OSPF Routing, HSRP, VLAN Segmentation, Access Control Lists (ACLs), NAT/PAT, Wireless Networking.

Technical Skills

Programming Languages: C, Java, Python

Hardware Description language: Verilog, VHDL

Technologies/Frameworks: HTML, CSS

Certificates

- Cisco Certified Network Associate
- Eduskills : Embedded Systems
- AWS Academy: AWS Cloud
